TECHNICAL SKILLS

Python, Basic Java, HTML, CSS, JavaScript, Bootstrap, NumPy, Pandas, Matplotlib, Django, MySQL, Microsoft Excel, Git, GitHub, VS Code, Figma

EDUCATION

Kalinga Institute of Industrial Technology <i>Bachelor of Technology in Electronics and Computer Science Engineering</i>	Bhubaneswar, Odisha 2022 – 2025
TTAADC Polytechnic Institute <i>Diploma in Electrical Engineering</i>	Khumlwng, Tripura 2019 – 2022
Kendriya Vidyalaya No-1 Kunjaban <i>Secondary School (CBSE)</i>	Agartala, Tripura 2018 – 2019

EXPERIENCE

Full Stack Python Developer Intern <i>Web Bocket Software Pvt Limited</i>	Nov 2025 – Present Bhubaneswar, IN
- Currently undergoing internship focused on Full Stack Python Development with hands-on exposure to real-world projects. - Gaining practical experience in frontend technologies (HTML, CSS, JavaScript) and backend development using Python and Django. - Working with databases (MySQL) for data storage, retrieval, and management. - Understanding and applying modern development workflows, including version control using Git/GitHub.	
Communication Navigation & Surveillance Engineer Intern <i>Airports Authority of India</i>	May 2023 – Jul 2023 Agartala, IN
- Gained hands-on exposure to VHF communication systems, automation systems, navigational aids (Nav-Aids), and airport operational technologies, understanding their role in aviation safety and efficiency. - Observed the functioning of CNS (Communication, Navigation, Surveillance) systems, including radar, communication protocols, and real-time monitoring systems used in air traffic management. - Developed a foundational understanding of airport infrastructure, safety protocols, and maintenance procedures, ensuring reliability and compliance with aviation standards.	

PROJECTS

Netflix Clone <i>HTML, CSS</i>
- Designed a responsive Netflix-inspired user interface using pure HTML and CSS, replicating homepage layout and structure. - Applied CSS Flexbox, Grid, and media queries to ensure responsiveness and consistent design across different screen sizes. - Implemented visually appealing components such as banners, content rows, and hover effects, improving UI/UX and layout structuring skills.
IAQ Monitoring System <i>Raspberry Pi Pico W, IoT, Sensors</i>
- Developed a low-cost indoor air quality monitoring system using Raspberry Pi Pico W to track PM2.5, temperature, humidity, CO, and VOC levels. - Integrated multiple environmental sensors for real-time data collection and analysis of air quality parameters. - Enhanced interpretability using Grad-CAM visualizations to highlight model focus regions for better transparency.
Smart Dustbin <i>Raspberry Pi Pico, Arduino Uno, IoT, Sensors</i>
- Built a smart dustbin with automatic lid operation using proximity sensors for hands-free & hygienic waste disposal. - Integrated a full-bin alert system to notify the user or collectors, improving waste management efficiency. - Designed using microcontrollers and basic IoT principles, enhancing automation and real-time monitoring capabilities.
