TECHNICAL SKILLS

Python, Basic Java, HTML, CSS, JavaScript, Bootstrap, NumPy, Pandas, Matplotlib, Django, SQLite, Git, GitHub, VS Code, Figma, Microsoft Excel, Microsoft Word

EDUCATION

Kalinga Institute of Industrial Technology <i>Bachelor of Technology in Electronics and Computer Science Engineering</i>	Bhubaneswar, Odisha 2022 – 2025
TTAADC Polytechnic Institute <i>Diploma in Electrical Engineering</i>	Khumlwng, Tripura 2019 – 2022
Kendriya Vidyalaya No-1 Kunjaban <i>Secondary Education (CBSE)</i>	Agartala, Tripura 2018 – 2019

EXPERIENCE

Full Stack Python Developer Intern <i>Web Bocket Software Pvt Limited</i>	Nov 2025 – May 2026 Bhubaneswar, IN
- Completed a Full Stack Python Development Internship with hands-on experience in developing web applications. - Developed responsive user interfaces using HTML, CSS, JavaScript, Bootstrap, and built backend functionalities using Python and Django. - Designed and managed SQLite databases for efficient data storage and retrieval. - Understood and applied modern development workflows, including version control using Git/GitHub.	
Communication Navigation & Surveillance Engineer Intern <i>Airports Authority of India</i>	May 2023 – Jul 2023 Agartala, IN
- Gained hands-on exposure to VHF communication systems, automation systems, navigational aids (Nav-Aids), and airport operational technologies, understanding their role in aviation safety and efficiency. - Observed the functioning of CNS (Communication, Navigation, Surveillance) systems, including radar, communication protocols, and real-time monitoring systems used in air traffic management. - Developed a foundational understanding of airport infrastructure, safety protocols, and maintenance procedures, ensuring reliability and compliance with aviation standards.	

PROJECTS

Gym Management System <i>Python, Django, SQLite, HTML, CSS, JavaScript</i>
- Developed a Full Stack Gym Management System using Django and SQLite with secure role-based authentication for Admin and Members. - Implemented CRUD (Create, Read, Update, Delete) operations for members, trainers, membership plans, workout plans, payments, attendance, equipment management, enquiries and feedback. - Designed a responsive interface using HTML, CSS, Bootstrap and JavaScript, ensuring seamless navigation, and an improved user experience across different screen size.
IAQ Monitoring System <i>Raspberry Pi Pico W, IoT, Sensors, GPIO Programming, Automation</i>
- Developed a low-cost indoor air quality monitoring system using Raspberry Pi Pico W to monitor PM2.5, temperature, humidity, CO, and VOC levels. - Integrated multiple environmental sensors for real-time data collection and analysis of air quality parameters. - Programmed the Raspberry Pi Pico W to interface with multiple sensors for reliable real-time environmental monitoring.
Smart Dustbin <i>Raspberry Pi Pico, Arduino Uno, IoT, Sensors, GPIO Programming, Automation</i>
- Built a smart dustbin with automatic lid operation using proximity sensors for hands-free & hygienic waste disposal. - Integrated a full-bin alert system to notify the user or collectors, improving waste management efficiency. - Designed using microcontrollers and basic IoT principles, enhancing automation and real-time monitoring capabilities.
